## Fishing Nets

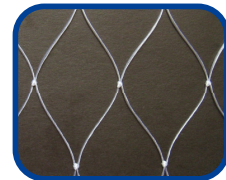

### Quality Fishing Nets

We produce our Fishing Nets in Indonesia under the tightest quality controls using net making machines with the latest technology. We constantly renew our equipments in order to maintain our quality standards.

### Why our nets are better?

- We use 100% pure row materials.
- We manufacture our own twine using a special procedure that colors it when extruded.
- As the twine is previously colored, our nets are not dyed after they are produced. The result is a homogeneous net color with no clearer tone on the knots.
- The knots are very strong and do not slide.
- Mesh size along the net is completely uniform.

### Fishing Nets Specification Table

	Row Materials	Twines	Meshes	Knots
Nylon Monofilament	100% pure	0.12 - 1.20 mm	10 - 500 mmsq	Double / Triple
Nylon Multifilament	100% pure	110D/2 - 210D/150	5 - 230 mmsq	Single / Double
Nylon Multi-Monofilament	100% pure	0.15 x 3 - 0.5 x 4	25 - 500 mmsq	Double
Nylon Multifilament Raschel	100% pure	110D/2 - 210D/150	5 - 230 mmsq	-
Polyethylene Twisted	100% pure	380D/4 - 380D/75	10 - 300 mmsq	Single
Polyethylene Braided	100% pure	2.50 - 5.00 mm	20 - 300 mmsq	Single
